PROFILE

DevOps Engineer with more than five years of experience supporting CI/CD engineering, platform operations, and technology delivery across banking, consulting, web development, and IT support environments. Experienced in building and operating automated delivery workflows for PT Bank BTN Tbk and PT Bank BTPN Tbk. Strong in Jenkins-based automation, container platforms, cloud infrastructure, DevSecOps, and cross-functional collaboration. AWS Certified Cloud Practitioner focused on reliable, secure, and maintainable software delivery.

WORK EXPERIENCE

DEVOPS ENGINEER

Jul 2025 - Present

PT Avows Technologies | Placement: PT Bank BTN Tbk

- Design, maintain, and troubleshoot CI/CD pipelines that automate repeatable delivery activities, improve release consistency, and reduce manual intervention across environments.
- Collaborate with development, operations, and security teams to embed quality and security controls throughout the SDLC and support dependable releases.
- Install and administer server instances while maintaining availability, performance, access, and alignment with organizational security requirements.
- Lead the migration of DevOps tools toward a modular architecture segmented by environment and application domain, and refactor pipelines with Jenkins Templating Engine for improved reuse and governance.

Tools: Jenkins, GitLab, Nexus, SonarQube, Docker, OKD, Alibaba Cloud, AWS

DEVOPS ENGINEER & CONSULTANT

Jan 2025 - Jun 2025

PT Piranti Narada Teknologi | Client engagements

- Researched DevOps and DevSecOps solutions through hands-on Proofs of Concept, documenting setup, limitations, findings, and practical adoption recommendations.
- Provided strategic guidance and technical support to client teams planning, adopting, and optimizing DevOps tools, delivery workflows, and secure engineering practices.
- Assessed challenges with internal and client stakeholders and translated feedback into scalable process improvements and implementation priorities.
- Prepared and presented structured progress reports covering pilot status, risks, blockers, decisions, and next steps to maintain transparency and stakeholder alignment.

Tools: Jenkins, GitLab, Nexus, SonarQube, Docker, OKD, AWS, Alibaba Cloud, GCP, Terraform, OWASP ZAP, Flyway

DEVOPS ENGINEER

Jan 2024 - Dec 2024

PT Metrocom Jaddi Technology | Placement: PT Bank BTN Tbk

- Developed and operated CI/CD pipelines for repeatable application delivery, reducing manual steps and supporting consistent deployments across environments.
- Partnered with development, operations, and security teams to integrate secure SDLC practices and resolve delivery issues throughout the release workflow.
- Maintained server instances, investigated pipeline failures, coordinated corrective actions, and documented recurring issues for faster future troubleshooting.
- Supported day-to-day delivery operations by tracking recurring release and infrastructure issues and communicating technical findings to relevant teams.

Tools: Jenkins, GitLab, Nexus, SonarQube, Docker, OKD, Alibaba Cloud, AWS

WORK EXPERIENCE - CONTINUED

DEVOPS PLATFORM ENGINEER & OPERATIONS

Jan 2023 - Dec 2023

PT Sinar Jernih Suksesindo | Placement: PT Bank BTPN Tbk

- Supported daily CI/CD operations, resolved delivery and tooling issues, and developed automation scripts for recurring platform activities.
- Reviewed DevOps tool access requests, validated project requirements, and aligned approvals with team needs and access governance practices.
- Monitored platform and DevOps tool availability, coordinated follow-up actions for incidents, and maintained visibility into issues affecting delivery workflows.
- Produced monthly reports covering deployments, incidents, completed activities, recurring issues, and pipeline improvements for operational review.

*Tools: Jenkins, GitLab, Nexus, SonarQube, Docker, OpenShift, Ansible***DEVOPS PLATFORM ENGINEER & OPERATIONS**

May 2022 - Dec 2022

PT Vlink Consulting | Placement: PT Bank BTPN Tbk

- Supported CI/CD processes and daily DevOps operations, resolving issues and maintaining continuity for application delivery teams.
- Created automation scripts for repeatable platform tasks and reviewed access requests against project ownership and team requirements.
- Monitored service availability and coordinated responses to operational issues affecting the DevOps platform and application delivery teams.
- Prepared reports on deployments, incidents, completed activities, recurring issues, and improvement actions across the platform.

*Tools: Jenkins, GitLab, Nexus, SonarQube, Docker, OpenShift***WEB DEVELOPER & IT TEACHER**

Jun 2019 - Mar 2022

Catholic Senior School & Self-Employed

- Designed, developed, tested, and maintained WordPress websites across front-end and back-end workflows, from initial requirements through ongoing support.
- Built responsive interfaces, integrated APIs and RESTful services, and maintained clean and usable application experiences.
- Maintained school networks, installed and configured software, and resolved hardware, software, and connectivity issues affecting daily activities.
- Provided practical technical guidance to students and teachers, helping users understand systems and resolve common technology problems.

Tools: GitHub, WordPress, XAMPP, Linux, Packet Tracer, React, Node.js, Python

QUALIFICATIONS

Bachelor of Computer Engineering

2024 - 2026

*Universitas Siber Asia***Associate Degree in Computer Engineering**

2016 - 2019

STMIK Profesional Makassar

COURSES & CERTIFICATIONS

AWS Certified Cloud Practitioner*Amazon Web Services | 2022***DevOps Foundation***NaradaCode | 2025***CCNAv7: Enterprise Networking, Security, and Automation***Cisco Networking Academy | 2020***Network Security***Digitalent - Cisco | 2024***Introduction to Jenkins (LFS167)***Linux Foundation | 2024***AWS Cloud Operations***ICS Compute | 2024***Architecting on AWS***ICS Compute | 2024***Full Stack Developer Bootcamp***DumbWays Indonesia | 2022***Introduction to Cybersecurity***Cisco Networking Academy | 2020***Dasar-Dasar DevOps***Dicoding - AWS | 2022*

SKILLS & OTHER

Delivery: Jenkins, Jenkins Templating Engine, GitLab CI, GitHub Actions, ArgoCD **Platforms:** Docker, Kubernetes, OKD/OpenShift, Helm

Cloud & Automation: AWS, GCP, Alibaba Cloud, Terraform, Ansible, Linux, Bash, Python **Quality:** SonarQube, Nexus, OWASP ZAP, Flyway

Languages: Bahasa Indonesia, English

Strengths: Cross-functional collaboration | Client consulting | Secure SDLC | Technical documentation | Incident reporting | Platform troubleshooting
